STD-4C Mailboxes

and Accessories

STD-4C Mailbox Suites

The Key to Good Design

The U.S. Postal Service Operations Manual provides the USPS with autonomy in determining the appropriate mode of delivery; which includes the location and type of equipment to be used. For multi-family new construction, that is most often the STD-4C mailbox.

As the first manufacturer to introduce a full USPS Approved line of mailboxes which met the mandatory USPS wall-mounted mailbox standard (STD) in 2006, we have continued to evolve the product line in order to keep pace with changing marketplace demands.

Our robust versatile™ 4C mailbox line was developed with a simple to use modular system that provides a very flexible solution for your individual project needs - taking the guesswork out of meeting the necessary USPS requirements and/or ADA Fair Housing requirements, too.

As an architecturally specified product, we take the guesswork out of the process by providing standard pre-configured options for simple installations, or give you the ability to custom-build a solution which will make your centralized mail center stand out from all the rest.

We are also pleased to offer you numerous industry exclusive standard features, finishes, and accessories; all providing greater design flexibility and installation solutions than any other STD-4C mail equipment available on the market today. So, whether you are replacing an outdated

mailbox installation, or starting a new construction project, Imperial stands ready to assist you.

Surface-mounted 4C mailboxes are perfect for limited wall depth projects.

These rugged 4C mailboxes are weather-resistant and can be used indoors or out.

versatile™ 4C Mailboxes

Flexibility without the fuss

Our versatile™ 4C mailboxes provide a simple, easy-to-use 'pre-configured' line of mailboxes and parcel lockers which all meet or exceed every security requirement of the USPS STD-4C regulation for wall-mounted mail receptacles. By providing different "suite" height options, adding the right module to your installation is quick and easy.

Offering more than 140 different individual modules to select from, plus the ability to configure any base module, Imperial has the most robust line of USPS Approved 4C products and installation accessories on the market today.

Product Design and Security Features

- Thick, reinforced collection door to prevent break-ins
- Master front-loading door has interlocking, overlapping seams to prevent prying
- Integrated outgoing mail collection compartment with weather protection hood and anti-fishing comb
- Solid aluminum frame protects adjacent customer/collection compartments
- One piece extruded hinge to prevent prying
- Multi-unit connector kit hardware supplied with every module for easier installation across larger openings
- Hardy stainless steel latching hook cam on every tenant door with EXCLUSIVE double-latching cam on all oversized doors
- EXCLUSIVE double-latching parcel locking mechanism design for added door security and strength

Color Options

Customize your versatile™ 4C module with one of eight different architectural color options, all in a durable, powder coat finish.

Colors shown are representative of the actual powder coat finish but are limited by printing conditions and may vary slightly from finished product.

STD-4C Mailboxes

Interlocking, overlapping seams to prevent prying

Heavy duty tenant cam lock with three keys

Standard decals or 3/4" H engraving

Solid aluminum integrated outgoing mail collection compartment prepared for USPS installed Arrow Lock

Product and manufacturer ID serial tag

Easy release handle to open master gate

Stainless steel hold open door catch on each side of master gate

Fully integrated parcel locker(s) with key trapping lock

Aluminum comb prevents mail fishing in outgoing mail collection compartment

Rugged, weather-resistant powder coat finish

Heavy duty cam latches through frame for added security

Options for STD-4C Mounting

4C Recessed Mount

All standard 4C modules are designed to be recessed into their mounting; whether it is directly into a wall, enclosure, or casing. The most common way to install the 4C modules is into a wall.

We make installation easy by providing a **Multi-Unit Connector Kit (MUCK)** for each specified module. This connector can be used to secure multiple units across a larger rough opening, eliminating the need for studs.

It also ensures your installation has a clean look as units are pulled together tightly so they are mounted flush to one another, reducing any potential gaps between modules.

Multi-Unit Connector Kit (MUCK)

Standard Features

- Rugged, weather-resistant powder coat finish resists scratching and vandalism
- Constructed of heavy gauge aluminum and 300 series stainless steel components for superior strength, corrosion resistance and outdoor durability
- Solid aluminum mail slot frame design protects adjacent customer compartment and collection compartment
- Unique double-locking parcel locking mechanism design for added mail package security
- USPS-1172 910A lock with three (3) keys

4CSM Surface Mount

Designed for indoor or outdoor use, this heavy duty mailbox enclosure allows 4C modules to easily be mounted to any flat surface. A mounting collar is included with all 4C-SM modules and is ideal for settings with limited wall depth or material that makes it difficult to cut in a rough opening. The surface collar matches the 4C module ensuring your final installation achieves a sleek, finished look while the easy-to-assemble slotted back design of the collar also simplifies installation.

Standard Features

- 4C collars are designed to fit and attach easily to ALL front-loading versatile™ 4C modules for both single- and double-wide configurations.
- All aluminum construction in rugged, weather-resistant powder coat finish
- Easy-to-assemble collar has industry EXCLUSIVE slotted back designed for ease in installation and reduction of overall unit weight.
- Unique double-locking parcel locking mechanism design for added mail package security
- USPS-1172 910A lock with three (3) keys

Mounting collar

4C Depot Cabinet

The versatile 4C Depot cabinet is a free-standing installation option for our secure, durable STD-4C wall-mounted mailboxes and parcel lockers. The Depot offers versatile options for limited indoor spaces, as it can be installed outside or inside.

Standard Features

- Rugged, weather-resistant powder coat finish resists scratching & vandalism
- Constructed of heavy gauge aluminum and 300 series stainless steel components for superior strength, corrosion resistance and outdoor durability
- Solid aluminum mail slot frame design protects adjacent customer compartment and collection compartment
- Unique double-locking parcel locking mechanism design for added mail package security
- Cabinet (included) is all aluminum construction in rugged, weather-resistant powder coat finish for outdoor use
- USPS-1172 910A lock with three (3) keys
- All 4C-D modules include matching cabinet for mounting

This Depot cabinet needs local servicing and USPS approval prior to purchasing unless it is for private use only

Module Choices

USPS and Private STD-4C Mailboxes

Over 115 individual mailbox modules are available, all of which can be customized with oversized doors and lock options for both postal and private delivery applications.

Collection Boxes

These secure modules complement your mailbox installation and are designed for all your collection needs; postal or private collection, x-rays, DVD/Blue Ray, books, etc.

Recycling Bins

Keep the centralized mail center tidy by providing receptacles for the disposal of unwanted mail, or create a recycling center with these matching modules.

Door ID Options

(actual size shown)

DECALS:

All 4Cs come standard with silver adhesive decals which are 1-1/2"H x 1-3/4"W.

Black lettering can contain up to five characters per decal.

ENGRAVING:

Custom engraving utilizes the USPS Standard US Block font and is 3/4" tall.

All engraving can include up to 12 characters per line, up to two lines per door.

(optional engraving into aluminum door)
